

In HTML, elements are categorized as either block-level or inline-level. Block-level elements typically start on a new line and take up the full width available, while inline-level elements do not start on a new line and only take up as much width as necessary.

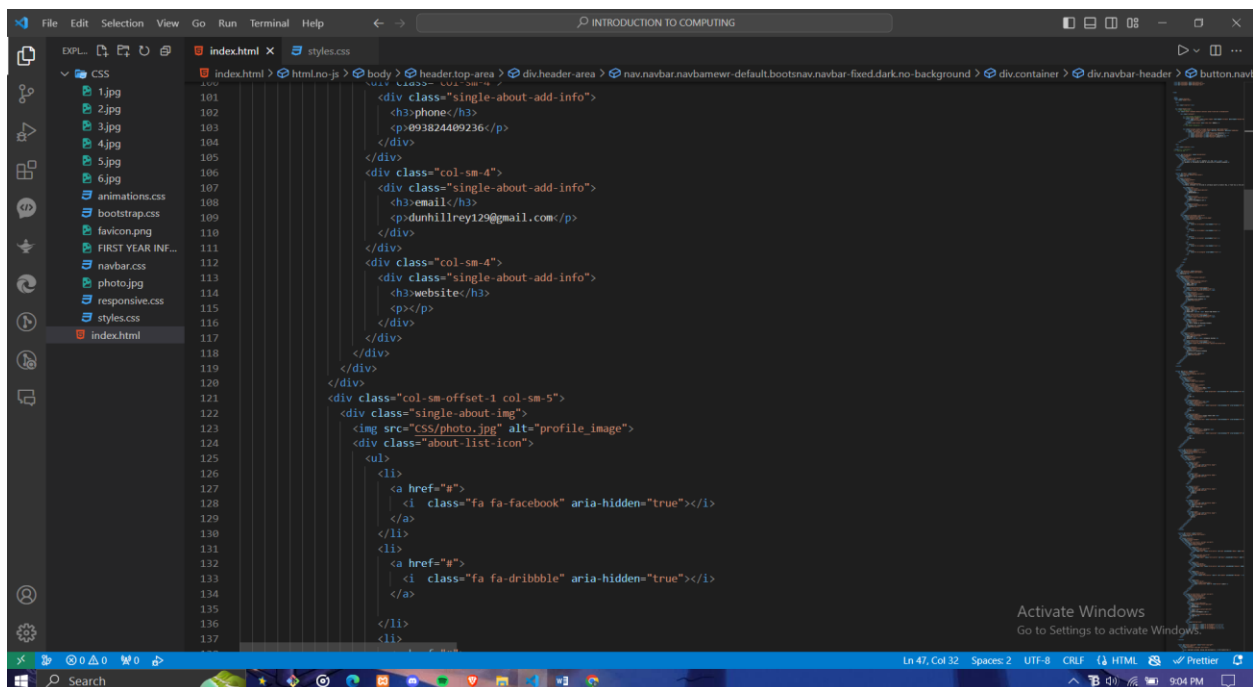

Here's what I did using those factors for my portfolio website

The screenshot shows a Visual Studio Code editor with a file explorer on the left and a code editor in the center. The file explorer shows a project structure with a 'CSS' folder containing various files like '1.jpg', '2.jpg', '3.jpg', '4.jpg', '5.jpg', '6.jpg', 'animations.css', 'bootstrap.css', 'favicon.png', 'FIRST YEAR INFO...', 'navbar.css', 'photo.jpg', 'responsive.css', 'styles.css', and 'index.html'. The code editor displays the HTML code for 'index.html'. The code is structured as follows:

```
<section id="welcome-hero" class="welcome-hero">
  <div class="container">
    <div class="row">
      <div class="col-md-12 text-center">
        <div class="header-text">
          <h2><span></span> I am <br> dunhill <br> rey <span></span></h2>
          <p>a bachelor of information systems at university of southern mindanao</p>
        </div>
      </div>
    </div>
  </div>

<section id="about" class="about">
  <div class="section-heading text-center">
    <h2>about me</h2>
  </div>
  <div class="container">
    <div class="about-content">
      <div class="row">
        <div class="col-sm-6">
          <div class="single-about-txt">
            <h3>Hello, everyone! I'm thrilled to introduce myself as Dunhill Rey, a fresh face in the world of Information Systems here at col
          </div>
        </div>
        <div class="row">
          <div class="col-sm-4">
            <div class="single-about-add-info">
              <h3>phone</h3>
              <p>093824409236</p>
            </div>
          </div>
          <div class="col-sm-4">
            <div class="single-about-add-info">
              <h3>email</h3>
              <p>dunhillrey129@gmail.com</p>
            </div>
          </div>
          <div class="col-sm-4">
            <div class="single-about-add-info">
              <h3>website</h3>
              <p></p>
            </div>
          </div>
        </div>
      </div>
      <div class="col-sm-offset-1 col-sm-5">
        <div class="single-about-img">
          
        </div>
        <div class="about-list-icon">
          <ul>
            <li>
              <a href="#">
                <i class="fa fa-facebook aria-hidden="true"></i>
              </a>
            </li>
            <li>
              <a href="#">
                <i class="fa fa-dribbble aria-hidden="true"></i>
              </a>
            </li>
          </ul>
        </div>
      </div>
    </div>
  </div>
```

The screenshot shows the same Visual Studio Code editor with the same file explorer. The code editor displays the HTML code for the 'about' section, continuing from the previous screenshot. The code is structured as follows:

```

      <div class="col-sm-4">
        <div class="single-about-add-info">
          <h3>phone</h3>
          <p>093824409236</p>
        </div>
      </div>
      <div class="col-sm-4">
        <div class="single-about-add-info">
          <h3>email</h3>
          <p>dunhillrey129@gmail.com</p>
        </div>
      </div>
      <div class="col-sm-4">
        <div class="single-about-add-info">
          <h3>website</h3>
          <p></p>
        </div>
      </div>
    </div>
  </div>
  <div class="col-sm-offset-1 col-sm-5">
    <div class="single-about-img">
      
    </div>
    <div class="about-list-icon">
      <ul>
        <li>
          <a href="#">
            <i class="fa fa-facebook aria-hidden="true"></i>
          </a>
        </li>
        <li>
          <a href="#">
            <i class="fa fa-dribbble aria-hidden="true"></i>
          </a>
        </li>
      </ul>
    </div>
  </div>
```
