

Creating a portfolio website is a great way to showcase your skills and projects. To implement the `<head>` tag for your HTML and CSS portfolio website, you need to focus on several key aspects. The `<head>` tag is where you include metadata, links to external resources, and other essential elements that define the structure and behavior of your webpage.

Here's the steps that I did to implement my head tag

```
1 <!DOCTYPE html>
2 <html class="no-js" lang="en">
3
4 <head>
5
6 <meta charset="utf-8">
7 <meta http-equiv="X-UA-Compatible" content="IE=edge">
8 <meta name="viewport" content="width=device-width, initial-scale=1">
9
10 <title>DUNHILL</title>
11
12 <link rel="shortcut icon" type="image/icon" href="CSS/favicon.png">
13
14 <link rel="stylesheet" href="CSS/animations.css">
15 <link rel="stylesheet" href="CSS/responsive.css">
16 <link rel="stylesheet" href="CSS/styles.css">
17 <link rel="stylesheet" href="CSS/bootstrap.css">
18 <link rel="stylesheet" href="CSS/navbar.css">
19
20
21
22
23 </head>
24
25 <body>
26
27 <!-- top-area Start -->
28 <header class="top-area">
29 <div class="header-area">
30 <!-- Start Navigation -->
31 <nav class="navbar navbar-expand default bootsnar navbar-fixed dark no-background">
32
33 <div class="container">
34
35 <!-- Start Header Navigation -->
36 <div class="navbar-header">
37 <button type="button" class="navbar-toggle" data-toggle="collapse" data-target="#navbar-menu">
```
